CHARLES D. BECHTOL, M.D.
MEDICAL AND RESEARCH DIRECTOR
F. MICHAEL O'BOURCE,
MANAGING DIRECTOR

To The O.R. Nurse:

Joint implant surgery is changing. New implants and new procedures require nursing personnel to constantly update their professional knowledge in order to remain abreast of the latest developments.

The JISRF's five year record of providing the latest information to nurses both in the O.R. and in postoperative care situations carries on in the 1977 presentation with discussions of the new generation of total joint replacements.

Expansion of the types and special designs of total joint implants of varying materials is just one area of course concentration. Modified instrumentation, preparation for special surgical exposures and the use of new ancillary equipment are all covered in this intensive 20 credit hour course.

Utilizing the latest in audio-visual techniques, Charles D. Bechtol, M.D., and Louise Bechtol, R.N., present the course. A unique audience participation format which includes film, slides, lecture and a personalized learning syllabus assists nurse participants in gaining a maximum amount of information from the three day presentation.

This once-yearly learning experience will be presented in Chicago on Friday, Saturday and Sunday, November 4th, 5th and 6th, 1977. We are still maintaining our registration fee at \$125.00. Course registration form and schedules are attached. Hotel information will be forwarded immediately upon receipt of your check and completed application.

We look forward to seeing you in Chicago.

Sincerely,

Michael O'Rourke
F. Michael O'Rourke,
Managing Director
